

BI Stone

Product Description

This laminated glass product is an authentic stone laminated glass. It combines glass and a thin layer of stone material. We offer a wide range of different stone materials like granites, onyx or marbles and other stone products to form both functional and decorative panel designs. Natural or artificial lighting can both be used to increase its striking visual effect. Surfaces and edges of the stone material have to be protected from moisture in the laminated product.

Your Advantages

- striking authentic visual effects;
- great range of possible unique designs created according to the customer's wishes and preferences
- does not contain any PVC
- UV protection: 97% of the harmful UV- radiation can be blocked to prevent the interior of buildings from discoloring or yellowing

Types of Application

- interiors (with VSG laminate): windows, enlightened walls, balustrades and railings, ceilings, vanity tops, and facades
- different applications in combination with isolating glass
- internal walls
- as elements of various furniture designs

Product range

sizes:

- standard 1.500 x 2.800 mm, depending on stone material
- other and larger sizes on request
