

BI Dichroic - Vision D

Product description

This laminated glass product has a scintillating, shimmering surface varying strongly in colour. Special layers of laminated glass reflect only certain rays of light, which creates a unique, scintillating “rainbow effect” varying according to lighting and the angle of looking at it.

Your Advantages

- modern and unique visual effects;
- for those who cannot or do not want to decide on one colour;
- improved visual as well as energetic and physical characteristics;
- does not contain any PVC;
- the dichroitic layer blocks up to 97% of harmful UV-rays, preventing the interior of buildings from discoloring or yellowing;

Types of Application

- interiors (with VSG laminate): windows, enlightened walls, balustrades and railings, ceilings, vanity tops, and facades;
- different applications in combination with isolated glass
- internal walls
- as elements of various furniture designs
